In addition, please indicate which of the following options you are interested in.

Website Maintenance

- Do It Yourself - I want to learn how to update content and images myself
- Done For You - I want Solo Web Solutions to make the changes for me so I can focus on building my business.

Search Engine Optimization (get found in the search engines)

- I can't find my site in the search engines at all and would like a decent chance of being found on Google.
- I want my site to be found on the first page of Google. I know that this will require ongoing attention to my site.

How much security do you want?

- None, I'll take my chances with hackers
- Basic protection of my site, e.g. keeping WordPress core, themes, and plugins updated so my site can be more secure than 90% of the people who have websites
- More advanced methods for protecting my site from hackers

I will bet you now have a much more clear idea of what your website needs are. Having done so will make our first consultation much more productive, which is FREE by the way.
